Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Mr. Lenhart presented the operation of his invention with respect to a physical mode and that of the DSI reference. Mr. Lenhart explained the operation of his prior art, Figure 5, and indicated that the spreadable element does not contact the limit stop disposed at an end of the inner tube. Mr. Kasper proposed to insert the language "and contactable with each limit stop" after "thereof" in claim 1, line 15. The examiner agreed that this language overcomes Lenhart '849 as the spreadable element does not contact the limit stop at the end of the inner tube. The examiner indicated that an update search will be conducted in respect to the new language.
